

GRAPHICS DESIGN BOOTCAMP

Graphic Design

Program Overview

This course is designed to teach individuals, professionals, and design enthusiasts essential graphics and visual communication skills that can be applied to all aspects of their career and personal development. This course makes use of the most commonly used graphic design tool and assists participants in developing in-depth knowledge of handling and managing all aspects of graphic design.

This course was created with everyone in mind, beginning with a basic understanding of design and progressing to a discussion of complex concepts and how they are applied. Each module includes step-by-step exercises that ensure participants are better equipped for their career journey.

Program Features

- 16 hours of instructor-led practical based learning
- 7 modules of an interactive learning experience
- 4 industry-based course-led projects
- Off-class mentorship.

Delivery Mode

- 80% practical, 10% lecture and 10% project-based.

Prerequisite

- The only prerequisite for this course is the interest to learn.

Target Audience

- Project Managers, Digital Marketers, Designers, Bloggers, professionals from virtually every field.

What you'll learn

- Implement the fundamentals of colour: visual, and pattern in design
- Use scale, weight, direction, texture, and space in a composition
- Create your own series of logos, flyers, and book cover designs using different techniques

Criteria for Certification

- Complete at least 90% of in-person training
- Successful evaluation of at least 50% of the course-led project (2 of 3 projects)
- Earn a score of at least 80% in course-end assessment (CBT)
